Superintendent Report

Construction Walkthrough

At present time most of the work is demoing of areas in preparation for the work in those areas to occur. Since there will be very little to see except the demoing I am recommending that we forgo the walkthrough meeting prior to our work session just for this month. Therefore, the work session will begin at 7:30 pm.

1st Floor Restrooms

Many areas on the floors have been marked to be redone and the walls will be completely tiled as per our discussion in the last construction walkthrough. There in all likely hood will be a slight charge from the plumbing contractor to remove the sinks from the walls and replace after the tile has been installed.

Elementary Student Handbook

Attached are concerns with discipline in the elementary handbook as presented by several parents. This was presented to me on June 16, 2014. In talking with the parents I shared a draft copy of the elementary handbook for next year which has been revised and addresses most if not all of the concerns. The changes leave little room for arbitrary and capricious decisions concerning specific discipline issues.

Business Manager

Quotes on Insurance

With the approval of the insurance for the board meeting it is important to note that I have sought quotes from not only the one we are approving but Snyder Insurance Agency and Pecks Insurance Company. The best deal we can get is definitely with PSBA because they provide schools the best possible deal on insurance.
