

Administrative Bulletin to Board Members June 27, 2014

Superintendent Report

Gym Floor

Attached is a copy of the evaluation for the gym floor. It is important to know that I asked for the cost to replace the entire floor. This is something I would not recommend because as you read through the information attached you will see our present floor is a quarter inch thicker than the floor they would replace it with. Therefore my recommendation will be to repair the present floor. This cost will be covered by the builder's risk insurance or the insurance of the group responsible. That will be an issue for the insurance companies to fight out. Unless there are concerns from you all I will indicate to all concerned at the next construction meeting on July 9, 2014, that we will be moving forward with the repair of our present floor.

Construction Meeting Minutes

I have attached a copy of the June 11, 2014 construction meeting minutes.

Change Order

I have attached a change order from the electrical contractor. This will be needed to add two additional doors to the existing time release schedule. It will also allow us to use our internet cabling to communicate with doors versus running separate lines. This is a changer order Mr. Bain and I would both recommend.

Asbestos Abatement

It was originally believed that the tile in the auditorium did not need to be abated. However once they started to strip the carpet they realized that it is asbestos and needs to go through the abatement process. Because of the large area this will probably be an \$8,000 to \$10,000 change order.

Title I and Title II

Mrs. Ifert and Mrs. Cutchall spent the day on Thursday completing our Title I and Title II applications. Since they are our Title I teachers I felt they would be able to provide the most accurate information for these programs. This could not have been done earlier because the state did not open the portal to do it online until Wednesday of this week.
